

Johns Hopkins Hospital/Wilmer Eye Institute is seeking a fellowship-trained neuro-ophthalmologist (additional fellowship training is great but not required) for a position that will include an active clinical practice at the Johns Hopkins Hospital/main Wilmer Eye Institute campus and possibly at one or two satellite facilities. Primary faculty appointment will be in the Department of Ophthalmology, with academic rank commensurate with experience. For ophthalmologists with an interest in surgical neuro-ophthalmology (either strabismus or orbit), joint appointments in and collaborations with the Departments of Neurology, Neurosurgery, and/or Otolaryngology would be encouraged and fostered. Although the division has been staffed by ophthalmologists for many years, neurologists are encouraged to apply as well.

Individuals with developed and active research programs and support should be aware that we recently opened a new research building in which state-of-the-art laboratory space and core facilities are available. We are also happy to consider applicants would be interested in a mentored research program supported by an NIH K-level or similar award.

As with all faculty appointments at the Johns Hopkins University, a search committee comprised of faculty from within and outside the Department will review all applications and make recommendations to the department chair. Under-represented minorities and women are especially encouraged to apply. Interested candidates are asked to send a CV and brief letter or note to psubram1@jhmi.edu. Alternatively, materials may be faxed or mailed to the address below.

Prem S. Subramanian, MD, PhD

Associate Professor of Ophthalmology, Neurology, and Neurosurgery
