

## Platform Session II

Arizona Salons 1-6

Tuesday, March 9, 2010

7:30 a.m. - 12:00 p.m.

*Moderators: Agnes Wong, MD, PhD, FRCS(C) and Prem Subramanian, MD, PhD - before break*

*Moderators: Alfredo Sadun, MD, PhD and Michael Lee, MD - after break*

7:30 a.m. - 7:45 a.m.

Nitza Goldenberg-Cohen

Growth Factors Enhance Differentiation of Adult Bone Marrow Derived Stem Cells in Ischemic Murine Retina

7:45 a.m. - 8:00 a.m.

Michael Salman

Prevalence Of Smooth Pursuit And Reflexive Saccades Abnormalities in Congenital Ocular Motor 'Apraxia'

8:00 a.m. - 8:15 a.m.

Heather Moss

Juvenile Ocular Myasthenia Gravis: Risk of Generalization and Amblyopia

8:15 a.m. - 8:30 a.m.

Patrick Yu-Wai-Man

Multi-System Neurological Disease is Common in Patients with OPA1 Mutations

8:30 a.m. - 8:45 a.m.

Claudia Krispel

Undiagnosed Idiopathic Intracranial Hypertension in a Population of Morbidly Obese Patients: A Prospective Study

8:45 a.m. - 9:00 a.m.

Fiona Costello

Correlating Retinal Nerve Fiber Layer Atrophy, Diffusion Tensor Imaging, and Visual Outcomes after Optic Neuritis

9:00 a.m. - 9:15 a.m.

Y. Joyce Liao

Transplantation of Differentiated Embryonic Stem Cells for Re-Population of Retinal Ganglion Cells in the Adult

**9:15 a.m. - 10:00 a.m.**

**Coffee Break**

**Arizona Ballroom Foyer**

10:00 a.m. - 10:15 a.m.

Jeong-Min Hwang

Absent Trochlear Nerve and Superior Oblique Hypoplasia in Patients with Congenital Superior Oblique Palsy

10:15 a.m. - 10:30 a.m.

John Keltner

Visual Field Profile of Optic Neuritis: A Final Follow-Up Report from the Optic Neuritis Treatment Trial (ONTT) from Baseline to 15 Years

10:30 a.m. - 10:45 a.m.

Robert Avery

Reference Range of Cerebrospinal Fluid Opening Pressure in Children

## Platform Session II

Arizona Salons 1-6

Tuesday, March 9, 2010

7:30 a.m. - 12:00 p.m.

*Moderators: Agnes Wong, MD, PhD, FRCS(C) and Prem Subramanian, MD, PhD - before break*

*Moderators: Alfredo Sadun, MD, PhD and Michael Lee, MD - after break*

10:45 a.m. - 11:00 a.m.

Mohammad Fouladvand

The Use of the Pipeline Embolization Device (PED) in the Treatment of Complex Symptomatic Cavernous and Paraophthalmic Segment Aneurysms of the Internal Carotid Artery (ICA): An Interim Analysis with 6 Month Follow-Up of Neuroophthalmologic and Angiograph

11:00 a.m. - 11:15 a.m.

Randy Kardon

The Value Of MRI in the Diagnosis of Giant Cell Arteritis

11:15 a.m. - 11:30 a.m.

Stacy Pineles

One Eye or Two: The Advantage and Significance of Binocular Low-Contrast Acuity Testing in Multiple Sclerosis

11:30 a.m. - 11:45 a.m.

Yi-Ren Chen

Superior Oblique Myokymia: Evidence for a Trochlear Neuropathy

11:45 a.m. - 12:00 p.m.

Beau Bruce

Non-mydratic fundus photography in the diagnosis of acute neuro-ophthalmic disease in the Emergency Department (ED)
