

2019 NANOS Annual Meeting- Trainee Best Abstract Award nominees

Fellow-in-training

Ryan A. Gise, MD- *The Visual Morbidity of Optic Nerve Head Drusen in Children: A Longitudinal Review*

Nickisa Hodgson, MD, MAS- *Traumatic Optic Neuropathy Biomechanics: High Speed Camera Assessment In An Animal Model*

Neha Irani, MD- *Feasibility of a non-mydrriatic fundus camera in an outpatient neurology clinic*

Andrew T. Melson, MD- *Superonasal Transconjunctival Optic Nerve Sheath Decompression(stOND): A Simplified Technique for Safe and Efficient Decompression*

Deborah C. Parish, MD- *Reported vs. actual height and weight among IIH patients*

Manon Philibert, MD- *The diagnostic value of MRI for ophthalmologic emergencies*

Melanie N. Truong-Le, DO- *Reflex Upper and Lower Eyelid Movement in Response to Light Stimuli*

Yao Wang, MD- *Inter-observer variability of vertical strabismus measurements using alternate prism cover testing and single Maddox rod*

Resident

Giulia Amore, MD- *Neuro-ophthalmological and clinical findings in Wolfram syndrome: what is the real mitochondrial role?*

Neena R. Cherayil, MD- *Clinical Characteristics of Spasmus Nutans and Their Association with Optic Pathway Gliomas/Sellar Masses*

Devon A. Cohen, MD- *Neuro-ophthalmic manifestations of collapsin response-mediator protein-5 (CRMP5) autoimmune neuropathy*

Laura Donaldson, MD, PhD- *Involvement of the Posterior Intracranial Circulation in Giant Cell Arteritis*

Michael J. Gilhooley, MA, MB, BChir, FRCOphth- *Melanopsin: targeted ectopic expression for optogenetic visual restoration*

Arnaud-Louis A. Jeannerot, MD- *Retinal microvasculature in pituitary adenoma patients: is optical coherence tomography angiography useful?*

Anshul Radotra, FY2- *'Virtual' IHH clinic: demonstrating a safe & efficient method of follow-up in an Ophthalmology centre*

Rahul A. Sharma, MD, MPH- *A Comparison of Giant Cell Arteritis Management in Subspecialty and Primary Care Settings*

Deidre M. St. Peter, MD- *Hyperbaric Therapy for Central Retinal Artery Occlusions*

Student

Rebecca Chen, BA- *A serial study of retrograde trans-synaptic degeneration following post-geniculate injury*

Samantha Goldberg, BA- *Optic nerve cupping in patients with retrograde trans-synaptic degeneration*

Angela Oh, BA- *Multivariate analysis and diagnostic value of OCT and OCT angiography measurements of optic atrophy*

Alexander L. Pearson, BA- *An Epidemiological Study of LHON Using a Large International Sample of Affected Individuals*

Lea L. Rueløkke, MB- *Optic Disc Drusen Associated Anterior Ischemic Optic Neuropathy: Prevalence of Comorbidities and Vascular Risk Factors*

Perry J. Thompson, BA- *Near Infrared Videography versus Direct Ophthalmoscopy for the Detection of Spontaneous Venous Pulsations*
