Dec 15, 2024	Match results	
Dec 16, 2024	Scramble for unfilled positions starts	
July, 2025	Matched candidates start their fellowship	

Fine Print

- Institutions may have more than one program that differ by special applicant requirements (e.g. neuro vs. ophth residency training, country of residency training)
- The participating programs agree not to make any appointments prior to the match (except those filled prior to June 4, 2022)
- Both parties are bound by the results of the match. However, an applicant’s actual entry into the training program (and continuation in it) is contingent upon satisfactory completion of the prerequisite training, any *special requirements the program may have stated explicitly for all applicants*, and satisfactory performance during training.

*for AUPO compliant clinical neuro-ophthalmology fellowships starting in 2024 and beyond for which there was not an agreement prior to June 4, 2022
