

NANOS Strategic Planning Goals

NANOS is charting its course for the years ahead, and the path is both ambitious and deeply rooted in who we are as a community. Our strategic plan brings together the priorities that matter most to our members: advancing research, strengthening the visibility and value of our specialty, expanding access to high-quality neuro-ophthalmic care, supporting the next generation, and preserving the welcoming, inclusive culture that defines NANOS.

Each goal reflects a commitment to the future of our field and to the people who make this society what it is. As you move through the meeting this week, I invite you to take a closer look at the full plan and see how each piece fits into the larger journey we're taking together.

- **NANOS will promote the well-being, viability, and sustainability of the neuro-ophthalmic profession**
- **NANOS will advocate for neuro-ophthalmologists, our patients, and neuro-ophthalmology as a profession**
- **NANOS will be the premier resource for neuro-ophthalmic educational programs and services**
- **NANOS will foster the development of an adequate supply of future neuro-ophthalmologists**
- **NANOS will continue to publish a high-quality journal**
