

North American Neuro-Ophthalmology Society
40th Annual Meeting

March 1-6, 2014

Wyndham Rio Mar Beach Resort • Rio Grande, Puerto Rico

Platform Session I

Monday, March 3, 2014 • 5:00 p.m. – 7:00 p.m.

Moderators: Y. Joyce Liao, MD, PhD & Michael Lee, MD

5:00 p.m. - 5:15 p.m.

Angela M. Herro, MD

Retinal Ganglion Cell Injury Precedes RNFL loss In Acute Optic Neuritis

5:15 p.m. - 5:30 p.m.

Fiona Costello, MD, FRCP

The Impact of Vitamin D Status on Recovery from Optic Neuritis

5:30 p.m. - 5:45 p.m.

Christian J Lueck, PhD, FRACP

Effects of Stimulating Melanopsin-Containing Retinal Ganglion Cells in Migraine Patients using Multifocal Objective Pupillometry

5:45 p.m. - 6:00 p.m.

Robert C. Sergott, MD

Progression of Plaques in Retina with Dementia in Alzheimer's Disease

6:00 p.m. - 6:15 p.m.

Sidney M. Gospe III, MD, PhD

Anatomic and Visual Outcomes of Pediatric Idiopathic Intracranial Hypertension

6:15 p.m. - 6:30 p.m.

Shaobo Lei, MD

Full-Field Chromatic Pupillometry in the Assessment of the Post-Illumination Pupil Response Driven by Melanopsin-containing Retinal Ganglion Cells

6:30 p.m. - 6:45 p.m.

David E. Newman-Toker, MD, PhD

Small Posterior Fossa Strokes Causing Severe Vertigo: Anatomic Distribution and Clinical Features of the "Lacunar" Acute Vestibular Syndrome

6:45 p.m. - 7:00 p.m.

Hadas Kalish, MD

Another reason for pediatricians to counsel against obesity; childhood body mass index above the 85th percentile is associated with a five-fold risk for recurrence of pediatric idiopathic intracranial hypertension
